In a $231 billion dollar industry that continues to gain popularity, competition remains fierce and customer loyalty remains elusive.

By using a state-of-the-art platform that harnesses the power of a fully automated AI solution to break speed and precision barriers that have plagued the industry, Incode takes this challenge head-on by empowering companies to create customer experiences of the future.

Gain assurance that your customers are who they say they are, by quickly and accurately verifying their ID.

Simplify onboarding

Make it simple for players to verify themselves in less than 10 secs. Any team can build a customized experience ranging from those that simply use an ID and selfie to security standards used by enterprises with the world's most stringent requirements.

Build seamless and customizable experiences

Take advantage of biometric authentication to protect in-grame perks and advertising revenues while shielding customers against credential theft. Get new players with a NIST-verified level of accuracy and performance.

Reduction in fraud

Reduce fraud by 99% and ensure that the player creating the account is who they claim to be with a high level of assurance. Reduce underage gambling by verifying the age of a player.

Comply with regulatory requirements

Expedite regulatory compliance including Know Your Customer (KYC) and Anti-Money Laundering (AML) in real-time.
